

up to 40 plants

LAISTYMO SISTEMA „KLASIKA SPIDER 4“ (from water supply)

- * Teflon sealing tape is required for all threaded connections.
- * When installing the valve, it is necessary to take attention to the arrow. It shows the direction of running water.
- * Remove the clamping ring from the adapter and place it on the pipe (Fig. 1).
- * Insert the adapter into the tube so that the edge of the tube touches the protrusion (Fig. 2)
- * Click the tube with the ring.
- * Connect the tube with the elbows and the tees in the same way
- * Make holes in the pipe at the required distance (Fig. 3 and 4)
- * Insert a compensator into the hole and place the „four-legged spider“ on it (Fig.5 and 6)
- * Attach the end of the tube with ending cap (Fig. 7)

- * Water permeability: 1 plant 1.5 liters per hour (1.5 L / h)
- * Hose length ~ 50 cm
- * It is recommended to raise the water tank to a height of at least 1 m

NOTE: The entire system must be flushed before the first watering.

- * If there is dirt in the water, use a filtre.

Watering set elements:

				
Valve 3/4x3/4 1 pcs	Elbow 3/4 1 pcs	Adapter 20mmx3/4 1 pcs	Elbow 20mm 2 pcs	Tee 20mm 1 pcs
				
Four-legged spider 10 pcs	Ending cap 2 pcs	Pipe 20mm 10 m	Hole puncher 1 pcs	Sealing tape 1 pcs
